Request For Suggestions For New Search Terms to be Added to the CASPIR Topic Index Lists For Searching Computer & Data Processing Art in Class 364 Subclasses 200 and 900

The CASPIR (Computer Aided Search and Patent Image Retrieval) system is a successor to the CCMSS (Computer Controlled Microfilm Search System). CASPIR is a mechanized search system which includes a database of over 9000 patents and other published documentsclassified in 364/200 (General Purpose Programmable Digital Computer Systems) and 364/900 (Miscellaneous Digital Data Processing Systems). For additional information concerning CASPIR, see 1052 OG 56 (Mar. 26, 1985).

Each document in the CASPIR database is "coded" (or numerically indexed) with selected terms that reflect the conceptual content of the document. Searching involves the use of these terms and boolean logic to identify documents containing teachings related to the concepts which correspond to the selected terms. The identified patents or other documents are then viewable on a microstrip viewer.

Currently, there is a term list of about 400 topics (concepts) for searching in the 364/200 art and there is another term list of about 400 topics for searching in the 364/900 art. Copies of these terms lists are available at the CASPIR terminals in the Public Search Room (Crystal Plaza, CP-3-1A-03) or by contacting the undersigned.

Each of these two CASPIR term lists is being expanded to incorporate emerging and growing areas within the art. Suggestions are invited — from attorneys/agents, searchers, inventors, or other interested parties — for new terms to be included on the expanded CASPIR term lists. Suggestions may be either for additional breakouts (i.e., indents or more subdivisions detailed) of existing categories on the old term lists or for wholly new categories (outdents) or concepts which are becoming particularly pertinent within the computer architecture and data processing art.

Responses to this notice may also include brief comments or definitions (and/or illustrative examples of hardware/software elements) indicative of the intended scope of the suggested new terms. In suggesting terms, those responding should be aware of the necessity to weigh the cost of coding documents for each term versus the usefulness of the term for search purposes in determining how many and what kinds of terms are submitted.

Date: Any suggestions for new CASPIR terms should be received by May 2, 1988.

Address: Address written comments and suggestions to the Commissioner of Patents and Trademarks, Washington, D.C. 20231 to the attention of Earl Levy, Crystal Plaza 4-11D-37. For further information contact Earl Levy by telephone at (703) 557-5088.

EARL LEVY,

IMPORTANT NOTICE

Incoming mail to the PTO has soared. Inappropriate phone calls to the Office and submission of inappropriately identified mail are taking valuable resources away from the processing of this mail.

The number of envelopes received in the Mail Room in the first four months of this fiscal year is almost 30% higher than for the same period last year. This sudden increase has taxed existing resources and a backlog has developed. It takes a new employee over one year to become proficient in recognizing the hundreds of different types of documents entering the Office, the appropriate fee codes to apply, and the appropriate destination. We are exploring alternatives for dealing with this problem.

We have discovered that many phone calls are being made to PTO personnel to verify if express mail and deposit box packages were received and on what date, to ask for serial numbers of newly filed applications, and to ask whether or not a particular paper was included in a package sent to the Office. These calls are draining hundreds of hours of time from the important function of processing the mail, including new applications. Such calls are inappropriately being made. Attorneys/applicants should include a return post card if they want early notification of date received and/or serial number. If the post card is not used, the filing receipt of notices or incomplete or informal application is the appropriate notification of such information.

The Commissioner has directed that this information is not to be given prior to issuance of the filing receipt or other formal notice. The service statistics report issued in the last Official Gazette of each month indicates the number of days it is taking to issue filing receipts. If it is clear that this period has been exceeded without notification being received, the Office will investigate.

The only recourse requesters have to obtain information other than as indicated above is by filing a petition in accordance with 37 CFR 1.182.

In regard to papers being submitted to the Office, a great deal of delay and wasted time results in trying to match papers not properly identified. On all papers related to patent applications or trademark applications, the series

code/serial number must be identified. Responses to a "Notice to File Missing Parts" or "Notice of Incomplete Application" must be accompanied by a copy of such notice.

Given there are about 30,000 documents to be processed and routed each day, severe delays will continue to exist unless there is compliance with these Office guidelines.

IMPROVEMENTS TO SERVICES

- *Establishment of a Special Box for Expedited Processing of Issue Fees* — Effective immediately, the Patent and Trademark Office has established a special box designator for issue fees to allow expedited processing of the Issue Fee Transmittal (PTOL Form 85), and the order for advance copies.

  In order to take advantage of this new service, the envelope should be addressed:

  Box Issue Fees
  Commissioner of Patents and Trademarks
  Washington, D.C. 20231

  Only the Issue Fee Transmittal (PTOL Form 85), advance copy orders and the fees associated with these two services are to be placed in the envelope. Including documents other than those specified will delay their reaching the area for which they are intended.

PLEASE USE THE NEW ISSUE FEE BOX.

- *Patent Bound Volumes* — Beginning with the Mar. 1, 1988 issue, we will make design patents available in the bound volume room (CP3, 2nd floor) along with all other patents. The design patents will be in a loose leaf notebook. Once a large enough quantity of design patents issue to complete a bound volume, these copies will be removed from the notebook and will be bound. This change in procedure was established as a result of a public suggestion.

- *Patent Search Room Copying Services* — For convenience of the users of the Patent Search Room we now have two photocopiers dedicated for 8½" x 11" paper. The machines are located in the North and South Stacks of the Patent Search Room. Previously, all copiers were supplied with legal size paper only and users who desired smaller size paper had to cut their copies.

HELPFUL HINTS

- *Expediting Processing Trademark Assignments* — As noted in our statistics we are currently running behind in processing trademark assignment documents. We are working to eliminate the backlog in this area. We have recently eliminated a backlog in patent assignment processing. The following helpful hints are offered to aid us in eliminating backlogs and to allow us to provide better service for all assignment processing:

  Many individuals are submitting assignment documents and requests for assignment services, together with application prosecution papers, directly to the examiner. Often, these requests get placed in the file and are not forwarded to the assignment area for handling. Please send all assignment documents and requests through the mailroom in order that they may be properly routed to the assignment area.

  Please separate requests for certified copies of assignments from requests for other services including requests for certified copies of other documents. Certification of assignment documents is not performed by the same individuals as certification of other documents.

- *Expediting Handling of Trademark Applications* — To facilitate processing of new trademark applications, place them in a separate envelope apart from all other mail. Identify on the outside of the envelope "TRADEMARK APPLICATION ONLY." More than one new trademark application may be placed in the same envelope. Do not place any papers in the envelope other than those related to the new trademark applications.

Mar. 7, 1988.

THERESA A. BRELSFORD,
Assistant Commissioner
for Administration.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
